

HUG Collection

INTENDED USE: The Hug collection is characterized by the possibility of combine table tops in Compactop or Iron, which can also be used outdoors, or in Laminate, for the most specific indoor settings. The table is made for contract or hospitality projects.

MATERIALS UTILIZED: The table is made with a 4-star aluminium base, equipped with adjustable feet, and aluminium column and cross. Table tops are made of Compactop or Iron top, for outdoor purposes, or made of chipboard support material and laminate surfaces, ABS edged (for indoor settings).

FINISHES: Slight differences in shades between different surfaces are possible. Furthermore, in the case of products purchased at different times, despite the use of durable materials for use in outdoor environments, natural-climatic factors can cause slight variations in shades.

CLEANING: Metal surfaces in steel and aluminum should be cleaned with a soft, damp cloth soaked in hot water. For stubborn stains, mild liquid soap can be diluted in water in moderation. Always dry after cleaning with a soft cloth. Do not use creams or pastes to clean metals, do not use chlorine, bleach or aggressive detergents. Do not use abrasive pastes or sponges that can scratch metal surfaces.

No specific maintenance other than normal cleaning is required for Compactop and Laminated tops. The tops can easily be cleaned and disinfected with hot water, steam and any common non-abrasive household detergents and disinfectants, as long as these are not highly alkaline. Just a couple of precautions are necessary: avoid using strong acids and bases and avoid wiping with highly abrasive substances or equipment.
