

# FLAP

Stacking Strap Instruction

Technique and design come together in the new Flap folding chair. Entirely in technopolymer and therefore completely recyclable, Flap folds easily into an extremely limited space, thanks to a patented system that also allows highly practical stackability.

Tecnica e design si fondono nella nuova sedia pieghevole Flap. Realizzata integralmente in tecnopolimero e quindi, completamente riciclabile, Flap si ripiega facilmente in uno spazio limitato, grazie ad un sistema brevettato che ne permette una pratica accatastabilità.
